

Letter of recommendation for Pomegranite

To whom it may concern,

Since 2018, PATA has worked with Pomegranite on a regular basis. Pomegranite's team are experts in web design, programming, and maintenance, covering both backend and frontend design of the website.

During this time, they have built and maintained our website, adding new sections over time, and have provided guidance on updating the design look and feel. They have built a large resource hub, developed online training sessions, and actively reported statistics and engagement on the website. The team provides ongoing guidance on how to maintain and update the website with a dynamic and engaging interface, considering user engagement and journey based on web analytics. These updates have been key in maintaining an engaging online space that is relatable and serves our audience.

Melissa, Jessica, Liz, and the team are not only dedicated to providing the best service possible, but they also go above and beyond to build strong client relations, which has been highly appreciated. Their reporting and transparency are commendable; you always know what you are paying for with this professional, friendly, and effective team of developers.

We have enjoyed a positive and productive relationship for many years with the Pomegranite team and would recommend their services.

Yours sincerely,

Angelita Silva
